PROFILE

Customer service, administration and now Front End developer. Positive and curious, in Adalab I have found the opportunity to grow professionally.

I had the opportunity to coordinate a team of 15 people, thanks to my organizational skills, to generate trust and to be able to assume responsibilities.

During my training and experience I realized that I am very comfortable working in a team and autonomously at the same time, and recently I have acquired the ease of working remotely.

SKILLS

- Teamwork
- Responsibility
- Communication
- Adaptability

LANGUAGES

English - B2
